

RackCrate Networks.
Start your own brand.

It All Starts With YOU.

(Not E-books. Not Multicraft. YOU.)

“Some people want to make \$10.00 per day, some have higher goals at \$150.00 per day and then some want to know how to make \$8,000 within a month to pay for some important bill that they need to. - Just work on your goals”

RackCrate Networks

How our relationship will work?

1

Work on sales and growing your community while creating the best customer experience you can provide.

We work hard to keep the operational costs low without sacrificing the high level of service and quality your customers expect.

2

Cost of start as a “good” provider by yourself.

For an average Web Hosting, Minecraft Hosting or an Reseller

	Cpanel Quarter price	Multicraft Quarter price	Domain Yearly price	Billing system Quarter price	Renting hardware Quarter price	Google Ads Monthly budget	Web Design Fixed price	Hardware purchase
Est. cost	\$120.00	\$156.00	\$12.00	\$96.00	\$720.00	\$1,800.00	\$5,000.00	\$3,500.00

*This are the estimated cost that made RackCrate possible in the first few 3 months when we didn't receive \$1.00 USD in those first 3 months starting out; and this budget doesn't include custom plugins for panel communication nor custom web design fixes and addons.

RackCrate Networks.

How we calculated a fair RevShare

1) We took RackCrate's revenue stream of the first 6 months of this year.

2018	Jan	Feb	Mar	April	May	June
Active serv.	~500	~510	~480	~550	~600	~560
Gross Inc.	\$2,900	\$3,000	\$2,600	\$3,400	\$4,500	\$3,600
Net Inc.	\$2,000	\$2,100	\$1,700	\$2,500	\$3,600	\$2,700

2) The net-income of RackCrate is usually $\frac{1}{3}$ of the gross income. Usually we distribute our Net as the following.

2018	Virtual assistants	Marketing strategies.	DC Remote Hands.	System improvements.
Active serv.	~22%	~33%	~25%	~25%

**UP TO
70% OF
REV SHARE**

3) Once you enter in the 70% Rev-Share. You will earn more than most minecraft hostings do. System improvements, Hardware replacement and marketing kill the profit from us.

RackCrate Networks.

Client stats.

The average minecraft customer buys a 4gb server.

The average minecraft hosting manage 600 servers monthly

The average price per GB of RAM is \$4.00 USD
